

The socio-economic and governance challenge

- 40% of the Palestinian communities are not served with essential water supply and sanitation.
- 25% of population of the West Bank are without proper services of water supply and safe sanitation.
- People with no services buy water from tankers at 3 times higher the average cost.
- Average consumption around 50 l/c/d.
- Water institutions with integrated approaches.
- Approved regulations, policies and strategies by NWC.

Supply Rate in the Served Communities with Water Network in Year 2003
